The national-security establishment's assassination of President John F. Kennedy was one of the pivotal events in our lifetime, and it continues to have an adverse impact on American life today. This conference will be oriented toward people who are not well-versed in the assassination and who wish to gain a deeper understanding of it.

The conference will present an easy-to-understand introduction to what happened and why. Consider it a primer on the Kennedy assassination. Attendees will learn about President Kennedy's foreign policy and how it was so different from that of both his predecessors and successors — and why the Pentagon and the CIA considered it to be such a grave threat to national security. Attendees will also learn about the fraudulent nature of the autopsy that the national-security establishment performed on the president's body on the evening of the assassination and how it leads to an understanding of the assassination itself.

The conference will consist of a weekly series of online presentations by various speakers, beginning Wednesday evening, March 3, and continue every Wednesday evening through April 21. By the time it is over, participants will have a good grasp of what happened on that fateful day in November 1963 and why it is so critically important today.

Admission: FREE
